

Copper Clean MC

1125

Instructions

Interior of Copper Vessel

STEP

1

- Thoroughly rinse kettle with warm water at 120-130F to remove the bulk of the soil load

STEP

2

- Dose Rate - 4 ounces per gallon ratio of Water @ 110-140F
- Slowly apply the recommended dose to water ratio through the manhole making sure not to dump large quantities all at once. Premixing in buckets is an option as well
- Circulate the solution for 15-20 minutes
- Longer cycle for less heat

STEP

3

- Drain and thoroughly rinse with water to drain

STEP

4

- Sanitize to Local Codes
