

## Technical Data Sheet

# Chlor Foam

### Description

A high-performance foaming cleaner formulated with caustic soda and chlorine for heavy-duty sanitation in brewery and food processing environments. Designed for use with foaming equipment, this cleaner clings to vertical and hard-to-reach surfaces, efficiently removing organic soils, beer stone, proteins, and biofilms. The chlorine component enhances oxidation and microbial control, delivering superior cleaning and sanitation in a single step.

### Directions For Use

Sanitize to local code

### Physical Properties

- Physical State -Liquid
- Appearance-Clear, Yellow
- PH: Alk.
- Odor- Chlorine-like
- Chemical Stability-Stable
